**Testimonial Letter for John Lowry**

John Lowry undertook work during 2009 for the creation of the new Coroner's Court in Fulwood for Lancashire County Council. John built the Coroner's benches, the witness box, the jury and advocates benches in both courts together with the signing in area at the reception. He erected the panelling at the rear of both Coroner's benches also facilitating the erection of the Coronial shields.

The project was completed on time. The quality of the work was excellent and the understanding of the service needs by John assured me that the work was always going to be fit for purpose.

A very good working relationship was established built on trust and integrity. John's attention to detail and high standards ensured a quality product. I would not hesitate to recommend John or request to use him for future schemes.

Yours Faithfully
